

HALO

THE AUTHENTIC COLLECTOR'S SERIES

CONSTRUCT THE EPIC BATTLE

NEW HALO TOYS FOR 2010

Continue to build the battle between the United Nations Space Command (UNSC) forces and the Covenant with all NEW MEGA Bloks Halo Action toys in 2010, with exciting additions to the 2009 construction sets based on Microsoft Game Studios' Halo!

MEGA Bloks invites you to bring the action packed scenes to life with builds from 65 to OVER 900 pieces! With impressive battling vehicles, intense aerial vehicles and authentic buildable figurines you can fight it out amongst your friends to see who will conquer! Look out for the most recognisable and iconic elements from the game, with highly detailed vehicles, awesome weapons and action figures for a true "build and play" experience. You decide who will win the fight between the UNSC forces and the Covenant.

Start your collection with one of the most anticipated toys of 2010 - the upgraded **UNSC Rocket Warthog**. Even better than the standard M12 Warthog, you can take down the Covenant with the all NEW 102mm SC-HE Rocket Turret! This arctic edition has cool white blocks for camouflage and can perform sub-zero manoeuvres against enemy targets. Recreate the epic battle scenes with this buildable UNSC Light Anti-Armour Vehicle which includes 4 working wheels against the Covenant Rapid Assault Vehicle with its new Covenant Ghost design for a faster and sturdier build. The set also includes two UNSC Arctic Spartan-II soldiers with M6D pistols, and one Covenant Elite with plasma energy sword!

Kick off the new 2010 collection with **Halo Combat Unit 4** which provides you with additional figures with matching weapons from the UNSC and Covenant boosting army numbers & allowing you to stage epic battles. The expansion packs also comes with display blocks so that you can arrange your collectable figurines in fierce poses to scare off the enemy!

What's more you can also collect 2 new **Halo UNSC Flame Marines**. Made with interchangeable parts for authentic builds and customised units, these red or arctic white figurines are also known as 'Hellbringer' and are a specialised UNSC unit trained to use a NA4 flamethrower to eliminate enemy infantry. Make sure you mix and match all magnetic warriors for great action and endless building experiences.

Not to be missed are the two new Halo buildable figures. Firstly collect the **EVA Blue Spartan**, a powerful and fearless buildable UNSC Spartan-II soldier. This buildable action figure has been designed with a ball and socket design for greater movement and includes a M19 SSM Rocket Launcher so you can go head-to-head with your most powerful fighters!

Secondly, attempting to derail the UNSC operation is the 221 piece **Covenant Arbiter** that has been sent by the Covenant on a suicide mission to eradicate the whole human race. Make sure you destroy the Arbiter before it destroys you!

Master the battlefield with new ground vehicle additions. The **UNSC Mongoose** is an 81 piece terrain vehicle capable of battlefield reconnaissance and high speed rapid assault manoeuvres. The **UNSC Arctic Wolverine** is an impressive anti-aircraft tank with detailed tread wheels that now comes with twin Argent V missile pods that really fire and a dual grenade launcher! What's more, you also get 1 UNSC Arctic Marine mini-figure with assault rifle and Covenant Hunter mini-figure with large and small shields.

On the enemy side, the **Covenant Wraith** is a heavy assault tank that is truly dangerous to overcome. A 458 piece build, with gun carriage and retracting plasma mortar cannon, this battle vehicle can wipe out practically any armoured or infantry target!

Moving to the skies, can you stop the Covenant in its tracks? The **UNSC Shortsword** is a short range bomber capable of devastating enemy advances. Deliver heavy explosives to bring to a halt the Covenant's defensive and offensive capabilities then move the UNSC ground forces in. Look out for the cool UNSC Pilot with M6D pistol and 2 fierce Covenant Jackals with type-51 carbines and shields.

Deliver troops and essential weapons to the battlefield with the efficient **UNSC Pelican Dropship**, a mainstay of the UNSC military, that ensures your army is well equipped at all times.

Check out the four rotating thrusters for VTOL (Vertical Takeoff and Landing) and working rear door and front cockpit that lets you deploy or evacuate UNSC forces within moments of landing!

Finally, the handy **Halo Collectors case** is essential for you to ensure that your unused pieces are safely stored away for your next mission! The case features three sets of technologically advanced Mark V armors in Orange, Arctic and Steel colours which fit over the Spartan skeleton that vastly improve strength, speed, agility and durability. Don't forget, the Halo Collector's Case also comes with a plasma sword, M7 submachine gun and a MA5 Assault Rifle, making it a must-have in the MEGA Bloks Halo range!

~ Ends ~
